

10104-E170524V2.2

Application:

- For fitting onto resistance thermometers and thermocouple thermometers to protect electrical connections between the temperature sensor and receiver
- For mounting of a ceramic block or temperature transmitter

Properties:

- Made in accordance with DIN43729
- Light and robust
- Protects electrical connections
- Degree of protection IP66
- Epoxy coated
- Thread M20x1.5 mm for securing the cable

MECHANICAL SPECIFICATIONS:

Case and cap material: Silumine

Surface: Epoxy coated

Special

Mounting of cap: Cap with screw

Process Entry: -----Ø6 mm Ø8 mm Special

Ambient temperatures min/max: -40 ÷ 100°C Special

Cable entry: ------M16x1,5mm PG9
