RESISTANCE THERMOMETER
Measuring insert: Fixed

Type: BP1-T-C
5459-E260924V3.2

Application:
- For measuring temperatures of liquid and gaseous media
- Integrated programmable transmitter with output signal: 4-20 mA
- For operations that require the sensor to couple quickly and uncouple electrically, and where a secure fixing of the cable is needed
- Usually applied in: Hygienic industry, Food and Beverage, Pharma

Properties:
- Integrated programmable transmitter with output signal 4/20mA
- Pt100 and Pt1000 in acc. with IEC 60751, 3-wire
- Mechanical and thermal stress in accordance with DIN 43772
- Measuring insert: Fixed
- Electrical connection: M12 (degree of protection IP65)
- Process attachment: Tri-Clamp
- Outer protective sheath and nipple: Stainless acid-proof steel
- Stands media temperatures of up to max. 250°C
- Ambient temperature min./max.: -40/+85°C
- Withstands vibrations
- Quick reaction time

MECHANICAL SPECIFICATIONS:

Protective sheath: --
EN 1.4571 (AISI 316Ti)
Special

Sensor diameter [mm] ----------------------------------
Ø5
Special

Immersion length L1 [mm]: ------------------------------
50 / 80 / 100 / 150 / 200 / 250
Special

Extension length L2 [mm]: -----------------------
None
50mm
Special

Process attachment: ----------------------------------
Clamp 3/4" APC
Clamp 11/2" DN38, ISO2852
Clamp 2" DN51, ISO2852
Special

Surface area of parts with media contact:---------
Mechanically polished <0,8 µm
Electro-polished <0,5 µm

ELECTRICAL SPECIFICATIONS

----Sensor element:
1xPt100

1xPt1000 (only cl. B 1/1 and cl. A)

-----Temperature range min/max:
-50/+180°C
-50/+250°C

-----Tolerance in acc. with IEC 60751:
Type A DIN (i.e.±(0,15+0,002xTactual)°C)
Type B 1/1 DIN (i.e.±(0,3+0,005xTactual)°C)
Type B 1/3 DIN (i.e.±(0,1+0,0017xTactual)°C)
Type B 1/6 DIN (i.e.±(0,06+0,00083xTactual)°C)
Type B 1/10 DIN (i.e.±(0,03+0,0005xTactual)°C)
Special

-----M12 connector:
Angled 90°
Straight
None

-----Cable:
(pre-mounted in M12 connector)
Cable type SS (Silicone-Silicone)
Cable type SBS (Silicone-Braided-Silicone)
Cable type TBT (Teflon-Braided-Teflon)
Special

-----Cable length L2 [m]:
2 / 4 / 6 / 10
Special

Calibration:
Temperature calibration are used to verify and certify the sensor to have the correct accuracy. We can do either: "In house" or "Accredited" calibration. Accredited is certified by 3.e part. Normally we do a calibration in 3 points.
Enhanced performance services:
Cold applications (below -50°C) will influence the material and the measurement. CRYO treatment is needed to ensure a correct and working sensor down to -196°C.

A sensor will always drift over time, especially when there are high temperature fluctuations.
With "Ageing treatment" we stabilize the sensor to ensure a minimum drift over time. The benefits are long term stability, more correct measurement and easier planning of calibration periods.

Documentation:
Please order the correct documentation when ordering the sensor.

SIGNAL PROCESSING

Common specifications

Supply
Supply voltage:	8.0 … 35 VDC
Iinternal power dissipation:	25 mW … 0.8 W

Respone time
Respone time
(Programmable):	0.33 … 60 s
Voltage drop:	8.0 VDC
Warm-up time:	5 min
Programming:	Loop Link
Singal / Noise ratio:Min.	60 dB
Signal dynamics, input:	19 bit
Signal dynamics, output:	16 bit
Effect of supply	
voltage change:	< 0.005% of span /VDC
Accuracy	Better than 0.1% of sel. Range
EMC immunity influence:	<+/-0.5% of span

Range:

4mA: °C

20mA: °C

CALIBRATION

----**Calibration:**
In house (Span -33°C - +700°C)

Accredited – in laboratory (-196°C - +1200°C)

1.	Point	°C
2.	Point	°C
3.	Point	°C
